

Free Electrical Service Call Checklist

A field-ready safety and diagnostic checklist for electricians — protect the homeowner, protect yourself, and document everything.

Safety First

- ☐ Confirm main breaker location and label accuracy
- ☐ Test for proper grounding at the panel
- ☐ Check for signs of scorching, melting, or burning smell

Panel & Wiring

- ☐ Inspect panel for double-tapped breakers or rust
- ☐ Check wire gauge matches breaker amperage
- ☐ Look for outdated wiring (knob-and-tube, aluminum)

Outlets & Switches

- ☐ Test GFCI outlets in kitchens, bathrooms, and outdoors
- ☐ Check for warm or discolored outlet covers
- ☐ Verify proper polarity and grounding at outlets

Fixtures & Devices

- ☐ Inspect light fixtures for flickering or loose connections
- ☐ Check smoke and CO detector wiring/battery status
- ☐ Test any dedicated circuits (AC, range, dryer)

Documentation & Close-Out

- ☐ Photos taken of all code violations or hazards
- ☐ Written estimate provided before repair work begins
- ☐ Permit requirements discussed if applicable
- ☐ Follow-up inspection scheduled if needed
