

Free HVAC Service Call Checklist

A field-ready checklist for HVAC techs — cover every diagnostic point and leave the customer with a clear, professional report.

Initial Assessment

- ☐ Confirm the exact complaint (no heat, no cool, noise, etc.)
- ☐ Check thermostat settings and battery/wiring
- ☐ Note system age, brand, and last service date

Airflow & Filters

- ☐ Inspect and replace air filter if needed
- ☐ Check supply and return vents for obstructions
- ☐ Measure airflow at key registers

Refrigerant & Cooling System

- ☐ Check refrigerant charge and pressure levels
- ☐ Inspect evaporator and condenser coils for buildup
- ☐ Look for signs of refrigerant leaks

Electrical & Components

- ☐ Test capacitors, contactors, and relays
- ☐ Check condensate drain line for clogs
- ☐ Inspect ductwork for visible leaks or damage

Documentation & Close-Out

- ☐ Photos taken of any worn or failing components
- ☐ System performance readings recorded
- ☐ Written estimate given for any needed repairs
- ☐ Maintenance plan or filter-change schedule discussed
