

Free Plumbing Service Call Checklist

A field-ready checklist for plumbers — diagnose fast, avoid comebacks, and give homeowners a clear picture of the work.

Initial Diagnosis

- ☐ Confirm the exact complaint with the homeowner before starting
- ☐ Check water pressure and shut-off valve locations
- ☐ Identify visible leaks, corrosion, or water staining
- ☐ Ask about age of fixtures, pipes, and water heater

Fixtures & Drains

- ☐ Test all faucets for drips, pressure, and drainage speed
- ☐ Inspect toilet for running, rocking, or base leaks
- ☐ Check under-sink connections and P-traps for leaks
- ☐ Snake or camera-inspect slow or clogged drains

Water Heater

- ☐ Check age, corrosion, and pressure relief valve
- ☐ Inspect for rust-colored water or unusual noises
- ☐ Confirm proper venting (gas units) or wiring (electric units)

Pipes & Supply Lines

- ☐ Inspect exposed pipes for corrosion or pinhole leaks
- ☐ Check for proper insulation in unconditioned spaces
- ☐ Test main shut-off valve operation

Documentation & Close-Out

- ☐ Photos taken of all problem areas
- ☐ Written estimate provided before starting repair work
- ☐ Invoice itemizes parts, labor, and any emergency fees
- ☐ Follow-up maintenance recommendation given
